FREE BICYCLE TOOLS AND SERVICES

Where do I find them?

1 FREE TOOLS

If you are living in the city and your bike needs a quick fix, you can look for free-to-use bicycle repair stations including tools and a pump. Often they are positioned in convenient places around the city center or close to big sports shops. Check your local bike organizations – they can guide you to those spots.
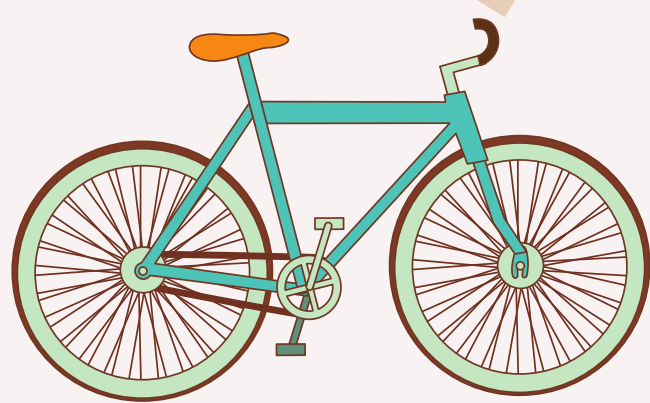

2 BICYCLE SHOPS

Most bicycle shops are open all year round and almost all of them offer bicycle repair services. Naturally, those aren't free , but if you only need some minor adjustment with a screwdriver or a wrench or only a pump to inflate your tire - you can always ask in a bike shop, if you can borrow them for a few minutes.

3 FREE BIKES

DONATION

Check out the classified ads on your local website or go to Facebook Marketplace. Often you can find an old bicycle that is being gifted and you only have to go pick it up. However, keep in mind that these bikes may not be in the best road condition and might need a proper check-up. Also don't forget to check if the sizing suits you.

4 LEARNING HOW TO RIDE A BIKE

If you are a new cyclist and need some help, you can first watch our video on how to start cycling.
Check in your city if there are cycling classes, especially in the local bicycle organizations.
Don't forget to ask your more experienced friends, they could also help you with your first steps into cycling.

5 "RENTING" FOR FREE

If you need a bike but can't afford one, you can check if there is a public rent-a-bike company. In some countries, the annual fee for such a bike is 1 EUR and you get the bike for free for at least 30 minutes - enough for you to commute from one rental station to another.
